

Many of the procedures performed at BrandeisMD and The PUMP Center use FDA approved/cleared devices and technologies for non-FDA approved indications. There is ample evidence that these procedures are safe and do no harm. I have provided several webinars that go into great detail the pros and cons of these procedures. In addition, I would recommend that you read the joint statement of the American Urologic Society and the Sexual Medicine Society of North America. I try to be fully transparent as to the risks and benefits of the procedures that I do, and make myself available for any questions you might have.
