

# Regenerative Therapies

We at The Urology Male Performance Center offer the latest in non-invasive and regenerative technologies for the treatment of Erectile Dysfunction and Peyronie's Disease. We provide a comfortable environment and informative patient education to serve our patients' needs.

Regenerative Medicine holds the transformative promise to regenerate parts of the human body and restores function lost to aging. It is an exciting and dynamic branch of medicine that holds the potential to repair and renew.

## Therapies we offer:

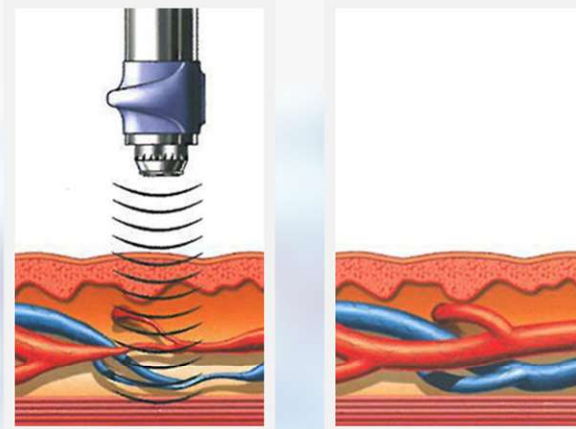

- P-shot - Platelet Rich Plasma
- Mesenchymal Stem Cell Shot from cord blood
- Nitric Oxide-Boosting Supplements

We painlessly treat Erectile Dysfunction, Peyronie's Disease, and improve performance using Shock Wave Therapy.

Dr. Brandeis was the first urologist in the San Francisco Bay Area to use Low-Intensity Shock Wave Therapy (SWT) to treat Erectile Dysfunction and Peyronie's disease. He has helped hundreds of men in our community restore sexual function. As a national thought leader and researcher, Dr. Brandeis has presented his initial findings to the Sexual Medicine Society and has contributed to books on this subject.

Shock Wave Therapy (SWT) is a non-invasive, painless office procedure that takes 20 minutes and helps men regain sexual function. After six weeks of treatment, 80% of patients have significant signs of improvement in sexual function and quality of life. Many are able to stop using medication.

Before

After

Shock Wave Therapy breaks up plaque formation in blood vessels and stimulates the growth of new blood vessels in the penis. Increased blood flow to the penis improves sexual function. In addition, SWT encourages the growth of new nerve tissue in the penis.

## Peyronie's Disease

The development of fibrous scar tissue inside the penis causes curved, painful erections and interferes with sexual function. Peyronie's disease rarely resolves naturally. Shock Wave Therapy is the most affordable and effective treatment.

## Performance

Normally men over the age of 50 do not perform as well as in their younger years. If you are experiencing subtle symptoms of difficulty getting or keeping an erection, decreased sensitivity or reduced ability to ejaculate, Shock Wave Therapy can help you.

- Better Erection Quality
- Enhanced Sensitivity
- Decreased Time between Orgasms
- Increased Confidence

Dr. Brandeis is the Urology Male Performance Center Medical Director and a Board Certified Urologist, who has special expertise in new Erectile Dysfunction (ED) technologies and Male Performance enhancement.

Recognized for the past 4 years by *SF Magazine* as a top urologic surgeon in the Bay Area, Dr. Brandeis is Chief of Urology for both John Muir Hospital and Hill Physicians. He has recently appeared on *The Doctors* TV show, *Aesthetics Show* and the *Ben Greenfield Fitness* podcast.

The PUMP Center provides a full array of options for ED, including Shock Wave Therapy, regenerative therapies, vacuum erection devices, injection therapy, and penile implants. Our center is also a leader in hormone replacement, Peyronie's Disease treatment, and other male performance issues.

Listen to Dr. Brandeis talk about Shock Wave Therapy and urological issues on the *Ben Greenfield Fitness* podcast. It ranked #1 on Apple's health podcasts for a week.
